Brand: Shadow Riser

Core Offer

- Premium landing pages for restaurants, salons, gyms, SaaS apps, car dealers, real estate, clinics, freelancers, and local service businesses.
- Lead capture and booking/contact workflows with form logic, Google Sheets-style tracking, email alert concepts, CRM handoff, and WhatsApp follow-up paths.
- AI FAQ/chat widget prototypes and AI voice front desk script demos for common customer questions, qualification, and appointment handoff.

Selected Portfolio Systems

- Shadow Riser Conversion Showroom: interactive industry switcher, theme engine, custom order builder, automation cockpit, and AI voice-agent simulator.
- 24-hour WhatsApp Sales Page Kit: Pakistani direct-client offer kit with salon demo, outreach scripts, lead tracker, and delivery checklist.
- Local Business Demo Library: salon, clinic, cafe, lead automation, booking flow, chatbot widget, and redesign audit prototypes.

Technical Skills

- HTML, CSS, JavaScript, responsive UI, mobile-first layout, form UX, animation, interactive state systems, GitHub Pages deployment.
- Automation planning with Google Sheets, Gmail/email alerts, webhooks, Zapier, Make, n8n, CRM-style handoff maps, and workflow testing checklists.
- AI-assisted interface planning, FAQ flow writing, voice-agent script design, customer qualification logic, and practical handover documentation.

Business Use Cases

- Restaurant/cafe reservations, salon appointments, gym trials, SaaS demo requests, car test drives, real estate viewings, freelancer project intake, and commercial campaign lead capture.
- Quote-first client process: scope the business goal, choose the funnel, define handoff tools, build the demo/page, test mobile behavior, and deliver clear setup notes.

Website Systems

Landing pages, service sections, proof blocks, FAQ, contact paths, and mobile conversion flows.

Automation Systems

Lead forms, Sheets-style trackers, email alerts, WhatsApp handoff, booking summaries, and delivery notes.

AI Front Desk

FAQ widgets and voice-agent demo scripts that qualify visitors and route them to human follow-up.

Note: Public AI, voice, and automation demos are simulations unless connected through approved private tools and client-provided access.
