SUMMARY

UI/UX Designer and web interface creator focused on clean, responsive, conversion-focused digital experiences for local businesses, AI tools, and digital products. I design landing pages, chatbot-style FAQ widgets, lead capture forms, booking/contact flows, redesign audits, and AI-assisted interface concepts. I am especially interested in AI product evaluation, usability review, and structured feedback that helps interfaces become clearer and easier to use.

EXPERIENCE

Freelance Web Interface & UI/UX Designer | Remote / Project-Based | 2024 - Present

- ? Design responsive landing page concepts with clear visual hierarchy, service structure, trust signals, and action-focused CTAs.
- ? Plan booking/contact flows, lead capture forms, FAQ widgets, and simple handoff systems for small-business use cases.
- ? Review website interfaces for usability issues including spacing, readability, navigation, mobile behavior, CTA clarity, and content flow.
- ? Create redesign audit concepts and prototype-style recommendations without claiming fake client results or unsupported metrics.
- ? Use AI tools for UX research support, content planning, interface critique, workflow mapping, and design iteration.

Fiverr Seller - Web Development, Landing Pages & AI Integrations | Remote

- ? Position freelance services around landing pages, booking/contact forms, FAQ chatbot-style widgets, redesign audits, and lead capture concepts.
- ? Create client-facing gig descriptions, service packages, and visual gig presentations focused on calls, messages, bookings, and inquiries.
- ? Apply UI/UX and conversion design thinking to improve how local-business services are presented online.

SELECTED PROJECTS

Local Business Landing Page System

Premium landing page concept for service businesses with responsive structure, trust-building layout, service cards, contact CTA, and lead form.

Salon & Beauty Booking Website

Beauty booking concept with service categories, visual gallery, before/after interaction, FAQ assistant, and appointment request form.

Lead Capture Automation Interface

Workflow concept connecting a website form to structured lead data, confirmation state, and email/WhatsApp handoff planning.

Han AI Assistant Web UI

AI assistant interface review focused on command flow, clarity, usability issues, and improvements that make the product easier to understand.

FAQ Chatbot Website Widget

Chatbot-style FAQ interface concept with quick replies, service/pricing answers, and contact handoff.

SKILLS

UI/UX Design | Web Interface Design | Landing Page Design | User Flow Planning | Wireframing | Responsive Design | Mobile-Friendly Interfaces | Usability Review | AI Product Evaluation | Chatbot/FAQ Widget UI | Lead Capture Form Design | Booking & Contact Flows | Conversion-Focused Design | UX Writing | Accessibility-Aware Design | Canva | Figma basic/learning | HTML & CSS | GitHub Pages | Google Sheets | AI-Assisted Workflow Planning

EDUCATION

Student / Self-Learning in UI/UX, Web Interfaces & Digital Product Design. Focused on UI/UX design, AI tools, automation workflows, landing pages, digital products, and freelance service development.

WHY I FIT UI/UX + AI EVALUATION WORK

I combine practical interface design, clear written communication, AI-assisted workflows, and usability review. I can evaluate interfaces, identify friction, suggest improvements, create simple user flows, and document design decisions clearly for remote product or AI training teams.
